

USER ACQUISITION MANAGER

Kanstantsin Sidarovich

5 years acquiring users for subscription apps and web funnels across **Google App Campaigns, Apple Search Ads, Meta and TikTok** on iOS and Android. I run accounts to **cohort payback and LTV-derived targets** — not to install volume.

user acquisition for subscription apps

\$80k/mo

peak monthly UA budget owned

4 channels

App Campaigns · ASA · Meta · TikTok

Singular · AppsFlyer

MMP attribution, D7/D30 ROAS, cohort payback

Experience

Senior User Acquisition Manager · Glite — subscription learning app (iOS + web2app)

Nov 2024 – Sep 2026

\$50–80k / month

- Owned user acquisition end to end as the **sole buyer on the project** — channel mix, campaign strategy, bidding, budget allocation and cohort reporting — working directly with the creative team
- Ran **Apple Search Ads** as the core iOS channel (~\$10–15k/month): brand, category, competitor and discovery campaigns, mining search terms from broad into exact, with Custom Product Pages matched to keyword themes — **blended CPI \$4–6**, ~30% of all iOS installs
- Built and scaled a **web2app quiz funnel** on non-brand Search and Performance Max, localized across DE, PL, TR and other markets — **4x growth from ~\$6k to ~\$28k/month** while holding target cost per trial
- Launched **iOS App Campaigns from zero** across 12+ GEOs, building the full event ladder (install → trial → paywall → purchase) at CPI \$2.3–4.7 and cost per trial \$6.5–14
- Set **target CPA from LTV per GEO** instead of a flat target at ~30–40% trial-to-paid, moving budget between ASA, App Campaigns and web2app based on which path paid back fastest in each market
- Built the measurement layer in-house: **Firebase in-app events into Google Ads, Apple Ads Attribution API and SKAdNetwork** on iOS, subscription analytics and BI cohort tables for retention and payback
- Briefed and iterated creatives with the design team — concepts judged on install-to-trial and trial-to-paid, not CTR

User Acquisition Manager · Genesis — PlantIn (plant identification subscription app)

Dec 2023 – Sep 2024

up to \$80k / month

- Owned multi-channel paid UA for **PlantIn — a market-leading plant identification app with 35M+ downloads** (~\$6.99/week or \$49.99 lifetime) across **Google App Campaigns, Apple Search Ads, Meta and TikTok app-install** on iOS and Android
- Scaled to **~30k installs per month at a blended CPI of ~\$2.5** (iOS ~\$4 / Android ~\$1.5) while holding target CPA and D30 ROAS
- Ran the account to **cohort economics rather than install volume**: trial-to-paid ~38%, D7 ROAS ~0.5, **D30 ROAS ~0.9**, **cohort payback around day 45**
- Owned attribution and measurement in **Singular** alongside Firebase — kept data integrity consistent across four channels and used cohort/LTV output as the input for budget allocation
- Worked around **iOS ATT/SKAN limits** using in-app signal and aggregated cohort reads instead of campaign-level attribution
- Led two junior buyers** through the scale-up: strategy, bidding and cohort analysis were mine; creative rotation, monitoring and routine reporting were theirs

Junior User Acquisition Manager · Fintech subscription app, web2web funnel (NDA)

Jan 2022 – Oct 2023

~\$50k / month

- Ran user acquisition across **Ukraine, Poland, Romania and the UK** — Google Search, Performance Max and Demand Gen plus Apple Search Ads
- Owned the funnel economics: a **\$2 five-day trial converting into a \$49/month subscription** at ~45% trial-to-paid, ~\$20 CPA per trial and ~\$125 LTV
- Helped implement **click → trial → rebill tracking** through server postbacks and offline conversion import; excluded view-through conversions from decision-making
- Flagged a hidden revenue leak — **bank declines in two markets cut trial-to-paid from 45% to ~25%** while ad metrics looked healthy; affected geos were capped and decline rate went into weekly reporting
- Handled daily operations — budget and bid adjustments, audience management, search query analysis, ad updates — and grew into owning assigned markets and running my own optimization tests

Skills

UA CHANNELS

Google App Campaigns · Apple Search Ads · Meta app-install & web2app · TikTok app-install · Demand Gen, Performance Max, Search · web2app & web2web funnels

ATTRIBUTION & ANALYTICS

Singular (MMP) · Firebase · Apple Ads Attribution API · SKAdNetwork / ATT · server postbacks & offline conversion import · Keitaro · Metabase · GA4 · cohort & LTV analysis

GROWTH & UNIT ECONOMICS

Target CPA/ROAS derived from LTV per GEO · D7 / D30 ROAS · cohort payback windows · trial-to-paid optimization · subscription funnel economics · cross-channel & cross-GEO allocation

CREATIVE

Creative briefs for app-install and UGC · hook-first testing frameworks · high-volume creative iteration · Canva · Figma · CapCut · AI tools (Claude, ChatGPT) for analysis and ad copy

WAYS OF WORKING

Multi-GEO scaling across Tier-1 and Tier-2 · localization · mentoring junior buyers · stakeholder reporting · owning a channel as the single accountable person

Education, Languages & Certifications

EDUCATION

University of Mannheim, Germany — Business Administration (BWL), 2022–2025. Germany's top-ranked university for business administration and economics.
Institute of International Relations, Kyiv — International Relations & International Business

LANGUAGES

Ukrainian — native · English — advanced (C1, IELTS, interview-ready) · Spanish — intermediate · Russian — fluent · German — basic

CERTIFICATIONS & COURSES

Google Ads certifications — Search, App, Measurement · Meta Blueprint (2024) · Performance Creative — Dara Denney · Lemon School — Targeted Advertising / PPC (2023)

Looking for a UA manager who bids to LTV, not to installs?

Every number in this CV comes from real ad accounts and MMP dashboards. Happy to walk through the structure, cohorts and decisions behind any of them on a call.
